

## Quality guarantee

Grömo has produced accessories for roof drainage since 1888 and guarantees top quality. Grömo products are produced in all common metals according to the presently valid DIN-EN 612 standard. Only the metals required in this standard are used:

- DIN-EN-988 zinc and zinc alloys
- DIN-EN-1172 copper and copper alloys
- DIN-EN-1396 aluminium and aluminium alloys
- DIN-EN-10088-1 stainless steels
- DIN-EN-10169-2 organically coated coils in galvanized steel
- DIN-EN-10326/27 galvanized steel strip and sheet steel

Grömo plug-in gutter outlets meet the demands of the DIN EN-12056 part 3 standard in their entirety and even exceed them. The confirmation and examination was made by the Technical University Munich.

Grömo takes further steps based on the corresponding quality standards:

- Examination of all products according to our quality management system.
- Strict examinations in the Incoming Goods Department of all used raw materials and semi-finished products.
- Participation in the German Packing-Waste Disposal-System INTERSEROH (no. 90098).
- Unmixed materials recycling (all used metals).
